

Session Notes 2026-09-05 — Worker cash accounts (phase 2a)

Shift Hub · Accounting · D:\vscode\todo · follows *Session Notes 2026-09-05 - Cash and bank accounts.pdf*

What was built

- **Five cash accounts** in Shift Hub: Georges, Abed, Khodr, Ziad, Mitri — each with its three Odoo cash journals (S LB, S DEV, SARL), its Excel ledger and its WhatsApp accounting group.
- **ledgers.js** (new server module): `import-excel` reads the person's workbook with a layout per sheet shape; `import-whatsapp` reads the group from the local WhatsApp archive and parses money messages (English "100\$ from mario", Arabic "٨٠٠ الف اجرة طريق", cents, LBP at 89,500); `link-transfers` joins a "from mario / from ziad" line with the same amount leaving the other person's account into one Transfer. Both readers run only on Mario's laptop (files + libraries are local); the hub answers with a clear error elsewhere.
- **The Excel is the account** (Mario's rule, folded in the same night): every Excel row counts. An Odoo entry equal to a row (same amount, same way, ≤ 3 days; or within 10% with a shared word) is folded onto that row — partner, company, analytic, the PCSH reference and the attachment — and the Odoo line itself is hidden and never counted. Odoo entries matching no row stay hidden behind the  **Odoo lines · N not in Excel** button. A WhatsApp message equal to a row is linked; one found nowhere else is kept aside under  **To review** (not counted) until accepted with ✓ or deleted.
- **Sign convention** (same as the Odoo cash journals): debit = the person paid or is owed (a supplier fronted, a day of labour), credit = money handed to them. Balance < 0 = the company owes them.
- Account settings (⚙) now carry the Excel file/sheet/layout, the WhatsApp group (with a group finder), the "since" date and LBP rate, plus the four import buttons and "Link transfers".

Result per account (2026-09-05 night, Excel-first)

Account	Excel rows (carrying an Odoo entry)	Odoo entries not in Excel	WhatsApp lines (matched / to review 	Transfers linked	Balance	Excel header says
Georges cash	107 (15)	15 (Dib/Anthony S DEV lines included)	13 (2 / 11)	1	-2,159.00	1,299 owed — header SUMIFS stops before the August rows; the rows add to 2,159
Abed cash	418 (15)	5	77 (42 / 35)	39	+17.15	-17.15 (received 17 extra) ✓
Khodr cash	316 (14)	3	63 (53 / 10)	26	-150.20	119.96 owed (sheet counts T2 differently; 30 apart)

Ziad cash	2,744 (59) since 2023-03	12	627 (525 / 102)	106	-21.39	21.49 to Mario ✓
Mitri cash	616 (16) since 2023-01	4	183 (117 / 66)	28	+230.44	210.50 due to Mario (20 apart)

Balance = the Excel rows plus accepted WhatsApp lines; negative = company owes the person. Odoo entries no longer move it.

Odoo entries that match no Excel row — Mario to decide

Hidden and not counted. Either the sheet missed them (add the row in the Excel and re-import) or Odoo booked something the sheet already has under another amount.

Account	Date	Amount	Odoo	Likely meaning
Georges	2026-02-01	-1,000	PCSH4/2026/00003 · BILL1/2026/02/0001 "AJ4193-FORMAN"	Lump-sum labour bill — the sheet has the same work as daily 40\$ rows → double count, one side must go
Georges	Feb 2026	-272	6 × CSH10 "from Georges Cash to Unknown" (15, 100, 25, 75, 7, 50)	Internal transfers that repeat vendor payments already linked (known Odoo double-count, see georges-sheet memory)
Georges	2026-02/03	-233	PCSH4 00002/00007/00008/00004 (mrad 17, 125, 7; Fahed Wood 84)	Material paid by Georges, not in his sheet
Georges	2026-03-09	+100	CSH10/2026/00002 SARL "from Unknown to Georges Cash"	Cash handed to Georges, not in sheet
Abed	2026-04..08	-103.32	Attal 62.16 + 6.16, KBM 13, KHC 14.55, NJK 7.45	Supplier tickets paid by Abed, missing from his sheet (or written with a different amount)
Khodr	2026-06..08	-19.79	Attal 4.44, Linkifi 12, pharmacy 3.35	Small tickets missing from his sheet
Ziad	2026-05-19	-2,330	PCSH5/2026/00005 S LB · BILL/2026/03/0002 Solaris	Big one: Solaris paid from Cash Ziad in Odoo, no such row in his sheet — check who really paid
Ziad	2026-05-12	+432.90	PCSH12/2026/00020 · INV/2026/00002 Phoenix Energy	Customer receipt collected by Ziad, not in sheet
Ziad	2026-01..05	-294	Attal ×7, Metaleo 56.61, Narinco 76	Supplier tickets not in sheet
Mitri	2026-05-25	+1,000	PCSH6/2026/00005 S LB · INV/2026/00025 Tony Menassa	Customer receipt collected by Mitri, not in his sheet — explains most of his +1,210
Mitri	2026-04/05	-20.90	Attal 9, SEC 11.90	Small tickets not in sheet

Decisions and rules folded in

- Labour rows (Georges 40\$/day, Abed 50–70\$/day, Khodr and Mitri hours × rate) come in as kind: labour debit lines so the hub balance equals the sheet's "due to employee". They are not in Odoo (only Georges' one 1,000 bill).
- Ziad's sheet is a wallet view (+ = in); his layout flips the sign. His salary draws ("Z39 - Ziad Payment July") are debits like any money out.
- Dib / Anthony transfers on Georges' S DEV journal were imported untouched, as the spec asked; they are in the Odoo total above.
- WhatsApp balance notes by Mario ("*balance* 185\$ to khoder", "واصل", "باقي من حسابك", "اضافي") and fuel tanks are skipped, not lines.
- Re-running any import updates in place; rows gone from a sheet are removed unless a person annotated or linked them.
- "Paid by" column: kept only for the 10 flagged Mario-cash lines physically paid by others; once those are linked as transfers the column has no job (Mario's question, answered in chat).

Next

- Mario: go through ? To review on each account (Ziad 106, Mitri 65, Abed 35, Georges 10, Khodr 10) and the Odoo-only lines above.
- Decide the Georges 1,000 lump bill vs daily rows, and the 2,330 Solaris on Cash Ziad.
- Phase 2b: Telegram capture per person; phase 2c: cash + gold dashboard. Budget page still reads only Whish accounts.
- Refresh the WhatsApp archive (last backup 2026-08-21) before the next import; Excel sheets run to 1 Sep.
