

Session Notes — Ibrahim (Ballouz / EAR) statement round

7 October 2026 · Mario Saliba with Claude Code · hub account ibrahim-cash · Odoo partner 421 "ibrahim"

Facts

- Ibrahim painted the steel for Dr Marc Ballouz's house (chat "ibrahim / dr marc ballouz", +961 76 041 531). Costed on analytic **EAR (Elie Abou Rjaye) 144**, like the existing Odoo lines.
- The chat is almost entirely voice notes: 351 messages 28 Aug → 25 Sep, 237 voice notes, 34 photos. WhatsApp Web no longer serves media older than ~3 weeks; everything was read from the phone backup (D:\whatsapp\msgstore.db + Media) and transcribed with whisper-1.
- Money (Mario, 7 Oct): **200 \$ paid as working days + 100 \$ for the products** he bought. Ibrahim's handwritten statement (photo 25 Sep 11:22) totals **76.76** and ends " $100 - 76.76 = 23.24$ "; Mario: the 23.24 counts as **additional working**. Nothing came back.

Receipts he paid himself (from the photos) — 79.45 \$ on him

Date	Doc	What	Amount	Odoo
3 Sep	Tinol S00226PI002449	1 quart Tinogloss RAL 7016 (10 \$ + 222,855 LBP cash)	\$12.49	SARL BILL/2026/09/0002 — Cash Mario payment cancelled, re-paid Settlement <i>paid by Ibrahim</i> (TRANS/2026/09/0025)
3 Sep	Electro Saade 2502	plastic cup (handwritten)	200,000 LBP = 2.23	S LB BILL/2026/09/0004 (existing) + photo attached
4 Sep	Electro Saade 2507 (undated)	brushes/tools, 4 lines 400k+200k+400k+200k	1,200,000 LBP = 13.41	S LB BILL/2026/09/0022
4 Sep	handwritten PAID note	spray gun 13.5, brushes 2"/1" 3, roller 6, stainless tie 0.5	\$23.00	S LB BILL/2026/09/0023
5 Sep	Electro Saade (Saturday)	2 sanding discs 400k + 1 item 300k	700,000 LBP = 7.82	S LB BILL/2026/09/0024
8 Sep	Invoice No 50	iron putty 1 kg 3.5, black sandpaper ×20 10, cutting discs ×2 3, keys 2"+3" 4	\$20.50	S LB BILL/2026/09/0025
Total (sum checked by Mario, 7 Oct)			\$79.45	

His statement says 76.76: he forgot the 200,000 note (2.23) and divides LBP by 90,000 instead of Odoo's 89,500 (0.46).

Final state (7 Oct)

- Money to him = two **transfer lines on his hub ledger**, booked by the "from Mario" rule like the other subcontractors: **200 \$ on 7 Sep** (working days) → PCSH1/2026/00147 12.49 from SARL Cash Mario (clears the Tinol paid-by) + PCSH1/2026/00246 187.51 from S LB Cash Mario; **100 \$ on 25 Sep** (products) → PCSH1/2026/00247 from S LB Cash Mario. Dates = the chat's anchors (7 Sep "coming to settle money"; 25 Sep statement day).
- Every row typed like the other workers: *expense* on the receipts, *vendor* on the Tinol settlement, *transfer* on the two payments. The Tinol row's project shows as hand-chosen (white) because the Odoo

settlement entry carries no analytic — the project lives on the Tinol bill in SARL.

- Odoo payables reconciled. Ibrahim: **SARL 0.00 · S LB +220.55** = paid 300 – receipts 79.45. **His labour is not booked yet** (200 working days + 23.24 = 223.24 per Mario). Once entered as a labour line and booked, the ledger closes at 2.69 in his favour (the forgotten note + LBP cents), or at 0 with a rounding entry like ZIADCASH-ROUNDING.
- Deleted on Mario's instruction: the 28 Aug 200 \$ lump bill + its payment, the 7 Sep "primer plate" placeholder, the first labour bill (220.55), the invented 100 \$ return and the first version of the payments. Backups: D:\vscode\odoo\ibrahim-deleted-20261007*.json.
- Hub feature added and deployed: 🗑 on an Odoo-backed row deletes the Odoo entry too (unreconcile → cancel → force_delete, plus every hub line of that entry) after a confirm; logged under odoo-delete.
- Account linked to the WhatsApp chat (msgstore 11461, since 2026-09-26) for the nightly read. BMA 00011921 \$117.88 (7 Sep, paid by Khoder) was already booked.

Open

- Book his labour 223.24; decide the 2.69 he under-claimed (pay it or a rounding gain).
- Electro Saade 2507 read as 1,200,000 LBP (his "13") — correct BILL/2026/09/0022 if the shop meant otherwise.
- From the chat: ~2,000 \$ of steel for Ballouz "hanging" (Mario 25 Sep 11:26) — not an Ibrahim item; leftover sheets are at his workshop.

Files

- D:\vscode\odoo\book-ibrahim-20261007.mjs — receipts + first payments (payments since replaced through the hub); deletions by _ibr-del*.mjs.
- D:\vscode\wa-contacts_ibrahim\ — arch-copy.mjs (archive → photos + voice), transcribe-b.mjs (whisper, 4 parallel), timeline.mjs → timeline.txt (full transcript by day), photos.
- Memory: ibrahim-ballouz-ledger.md.
