

Session Notes 2026-09-04 — Whish page: full suggested-partner label

Project: Shift Hub / To-Do app (D:\vscode\todo) · Pages: Accounting → Whish and Wise · Author: Claude Code with Mario

Problem

On the Whish accounting grid, the small italic suggestion under the company dropdown (e.g. *Georges EL Hajj / SHIFT DEVELOPMENT*) was cut to "Georges EL Hajj / S...". Cause: the label was capped at 96 px wide with an ellipsis (`.sug-act .what` in `accounting.html`). The Wise page had the same clipping rule (`.sug .what` in `wise.html`).

Fix

- Suggestion label now drops to its own line under the ✓ ✕ ✓n buttons (`flex-wrap` + `flex-basis:100%`) and wraps, so the whole "partner / company" text is visible.
- Hover tooltip added on the label: "Suggested: <partner / company>".
- Same wrap rule applied to the Wise page.

File	Change
accounting.html	CSS line ~95 (.sug-act / .what) + title attribute on the label span
wise.html	CSS line ~62-63 (.sug / .what)

Status

- Verified the local server (127.0.0.1:8081/accounting/whish and /wise) serves the new CSS. No screenshot: both Playwright browsers were locked by other sessions and Edge headless would not write one.
- Committed and pushed to `main` by a parallel session as part of commit `ef149be` "Whish: Book on the row — bill created, posted and paid in one click". The app deploys on Vercel from `main` (hub.shift-group.co).

Next

- Glance at one Whish row with a suggestion on hub.shift-group.co to confirm the label reads in full; if the company column looks too tall, widen `.c-company` (currently 140 px) instead of re-capping the label.
