

Session Notes — WhatsApp viewer and Shift Hub

6–7 October 2026 · Mario Saliba with Claude Code

Facts

- **Odoo white screen (6–7 Oct)** was caused by a style file a Claude script added on 5 Oct (ir.asset 133 "analytic split wraps", path to a non-existent add-on). Deactivated 7 Oct → Odoo loads again. Analytic tags are cut off ("...") again.
- **Khoder ↔ Walid:** page `hub.shift-group.co/khoder?k=3837c15ab766891acd59`, 28 Sep–5 Oct: Shift \$92.77, Walid \$92.74 (coincidence), no overlaps. Phone view = one card per day.
- **Ziad** is a foreman on public transport — no car; "Ziad car" removed everywhere. His 14 Sep \$21 benzine = BMW → Ajaltoun 4193, division Prefab, "transportation for door prefab" (BILL/2026/09/0016 reposted, residual 167.00). His 16 Sep fares are EAR. 6 Oct day: 08:00–12:47, GENERAL (Mario's car at Walid Berkachi).
- **Georges** 6 Oct: half day \$20, Ajaltoun 4193.
- **16 Sep whereabouts:** Khoder — Joseph Aswad pickup + Sin el Fil errand, day tagged EAR; Abed — Raashin (Charbel Akiki), PU boards and insulation.
- **Tanks:** Tacoma 79 L · Laredo 78 · BMW 318 (1995) 65 · RAV4 57 (also BMW 320 63, Grand Cherokee 2016 93, Pathfinder 2005 80 / 2014 74).
- **Sign rule (hub = Odoo):** positive = on Shift's side (holds Shift's money / owes Shift, customer); negative = Shift owes (vendor, worker). Shown on each WhatsApp card.

Built / changed

Where	What
WhatsApp viewer	Sending ~2× faster (only the sent chat reloads); phone header lighter, date via the day bar; balance meaning on cards; Division = type-to-search; Whish screenshots tied to their "from mario" line (card shows under the photo); day view jumps to today after a send.
Hub — every page	Rule: photos and papers open in the same page (<code>media-viewer.js</code> injected by <code>server.js</code>). Every page installable as its own app (↓ Install on Android). ☰ menu = fast navigation + AI button on/off; ♦ AI button draggable; phone bottom strip removed.
Shift WhatsApp (/site)	In-page photo/PDF viewer; receipts auto-suggest partner/project/company (history, then Claude); edit ▶ has ♦ Suggest and 🗣 Dictate / 📝 note; scan: drag sides and corners, WhatsApp-style layout (choices on top, green >/▶ bottom-right).
WhatsApp outbox	<code>/whatsapp-outbox</code> : queue messages while the laptop is off; task WhatsAppOutbox (every minute) sends them one by one through the ban-safety guard, Telegram summary; >12 h old waits for "send anyway"; <code>/whatsapp</code> redirects there when the laptop is offline.
Rules for the hub	<code>D:\vscode\todo\CLAUDE.md</code> (new) — same-page media, installable pages, verify before deploy, Beirut dates.
Claude Code	<code>~/.claude/keybindings.json</code> : Esc no longer cancels in the terminal version; the VS Code chat panel has no such setting.

Decisions

- Every hub photo/paper opens in the same page — past and future pages (memory feedback-hub-media-same-page).
- Never add Odoo backend styles (ir.asset) from a script (memory odoo-custom-asset-white-screen).
- Outbox: unconfirmed sends are marked "check", never retried.

Next actions

- Outbox step 2 (offline copy of recent chats in the page) and step 3 (react / delete / save contact through the queue) — on request.
- Test the outbox with the laptop really off; test ↓ Install on an Android phone; first real ♦ Suggest / Dictate.
- Optional: fuel account rule to recognise بنزين (would rewrite September bills once more).
- Waiting on Mario: CallMeBot @username (generator call alert); Kassab contact to save by hand; Ziad's workbook timesheet blank 24–30 Sep and October.

Files

- D:\vscode\todo\ — media-viewer.js, install.js, wa-outbox.js, wa-outbox.html, khoder.html/js, line-sheet.js, ask.js, admin-shared.js, scan-editor.js, site.js, server.js, CLAUDE.md
- D:\vscode\whatsapp-local\ — server.js, hub-review.js, public/app.js, public/style.css, tools/fuel-odometer.cjs
- D:\vscode\wa-contacts\ — outbox.mjs (+ outbox.log), send.mjs
- D:\vscode\wa-photos\tie-photos.mjs — Whish screenshot → existing line
